ABOUT THE COMPANY

The company **RUDOLF JELÍNEK** is engaged in the production of alcoholic beverages, especially fruit distillates and spirits. The tradition of the production of fruit distillates in Vizovice dates back to the year 1585. Due to the fact, that the company **RUDOLF JELÍNEK** has been since the beginning a company based on traditions which are being kept alive already for 125 years, we believe that our name and brand will grow and exist many more years to come.

Thanks to all of our company's traditions, our products are known all over the Czech Republic but as well in many different countries all over the world. The company continues with one of the traditions, which is exporting products abroad, which Rudolf Jelínek began with our Kosher spirits to the overseas markets, namely the USA in the early 1934.

The flagship of our company is the plum brandy (slivovitz), which is produced in several variations (white, gold, jubilee, Kosher, and more). We also produce other branded fruit distillates of the highest quality such as pear, apricot, cherry or apple.

Our premium products are the Kosher distillates, which are approved and granted by the American certificate, the Orthodox Union.

In 2003, the company began planting its own plum orchards on the southern slope of the Vizovice Valley, in the area called Těchlov. After five years, we harvested our first harvest of Vizovice plums and so we started a new tradition – the production of a limited series of Vizovice plum distillate. At the end of 2013 we expanded the area of the orchards and now dispose of 84 ha of plum orchards, 15 ha of cherry orchards and 80 ha of apricot orchards.

SLIVOVITZ

SLIVOVITZ

"Slivovitz is the most famous Czech fruit distillate, which has been prepared for you in Vizovice by the company RUDOLF JELÍNEK from the best plum mash since the 19th century. The production processes have been passed down from generation to generation by our master distillers, and together with the latest technology, the highest quality is ensured."

"Slivovitz is properly served at a temperature corresponding to its surroundings, since it is the only way to achieve the full development of its flavor and aroma."

GOLD SLIVOVITZ 45% 0,7L - gold slivovitz is unique in the world of fruit distillates and is traditionally produced in the Wallachian bastion by our master distillers, in Vizovice. The basis of this distillate is classic slivovitz. The Jelinek brothers and French company Denis Mounié together gave birth to this unique gold slivovitz. The RUDOLF JELINEK company continues this tradition up to the present day. The production of slivovitz begins with a three-stage distillation of ripe plum mash. The distillate is then stored for aging in oak barrels. Aging in barrels transforms the classic slivovitz into a unique distillate, characterized by its golden color and aroma like cognac or brandy, with harmonious fruit flavors and subtle woody undertones.

SLIVOVITZ 45% 0,7L - the classical R. JELINEK plum distillate is produced in three stages of distilling. This process gives the slivovitz purity and smoothness. The pits remain present in the mash the whole time to supply the resulting beverage with tannins for a specific flavor. It is precisely the presence of pits in the mash together with aging by which the slivovitz acquires a soft, rounded fruit flavor with pleasant undertones. The 120-year long tradition of manufacturing our plum distillate in the R. JELINEK company is a guarantee for supreme quality.

BOHEMIA HONEY 35% 0,7L - a liqueur, which combines the plum distillate with the natural linden honey. Natural honey aroma with a light fruity tone of plums creates a fresh taste and sweet aftertaste.
